An aerial view of a city at dusk or dawn, with a blue and orange color palette. Several white location pins are placed across the city, connected by thin white lines, suggesting a network or tracking system. The background shows a dense urban landscape with skyscrapers and highways.

**VEHICLE
TRACKING &
MANAGEMENT
SOLUTION**

**YOU CAN TRACK AND CONTROL
YOUR VEHICLE(S) ANYTIME,
FROM ANYWHERE WITH
ITRACKER VEHICLE TRACKING
SOLUTIONS.**

OUR COMPANY

iTracker is the first Vehicle Management System created entirely in market offering customized service for clients. It is a web based GPS tracker, which can be used in both personal and commercial cars.

OUR VISION

As part of IFAD Group, our core vision is to shape up a different looking Bangladesh through the continuous development and refinement of Technology, Research and Entrepreneurship by providing safety and security for the millions of vehicle and fleet with advanced technology.

Vehicle Management System (VMS)

Fleet Management is a comprehensive, vehicle, driver and goods monitoring, control and management. It's an effective low cost operation for fleet and logistic operators, corporate organizations and agencies, and government agencies.

In addition to the facilities of tracking service, fleet management can be customized for operation of individual user organization.

The essence of telemetry and use of location based services (LBS) is to enhance security, efficiency and reduce operation cost. In addition, it also enhances effective monitoring and control of personnel and assets.

**OUR AIM IS TO
CONSTRUCT A MORAL
AND ETHICAL GROUND IN
SOCIAL AND
TRANSPORTATION
SYSTEM BY
ESTABLISHING TRUST,
TRANSPARENCY AND
TRUTHFULNESS
BETWEEN THE VEHICLE
OWNERS AND DRIVERS.**

Benefits

MOBILE CHARGES & SAFETY

Monitor your drivers live on screen all the time.

VEHICLE USAGE

Out of hours vehicle usage is always logged and visits to known locations is consistently noted.

THEFT MANAGEMENT

Stolen vehicles can be tracked in real time with notification via SMS, Application & Web Portal.

FLEET MANAGEMENT

Single or multi-vehicle tracking means you can monitor your fleet and best utilize it throughout the day for the benefit of both the company and customers.

ENGINE STATUS

You can view instantly if the vehicle is on the move with the ignition being turned on or off of a vehicle, along with how fast it is going and exactly where its location is - at NO HIDDEN COST.

CONTROL OVER VEHICLE SPEED

You can control individual vehicle speed remotely.

Tracking

Vehicle tracking systems can be divided into passive and active.

Passive tracking systems collect and save all the information that can be retrieved later.

Active tracking systems collect and send information in the real-time and hence, offer more advantages.

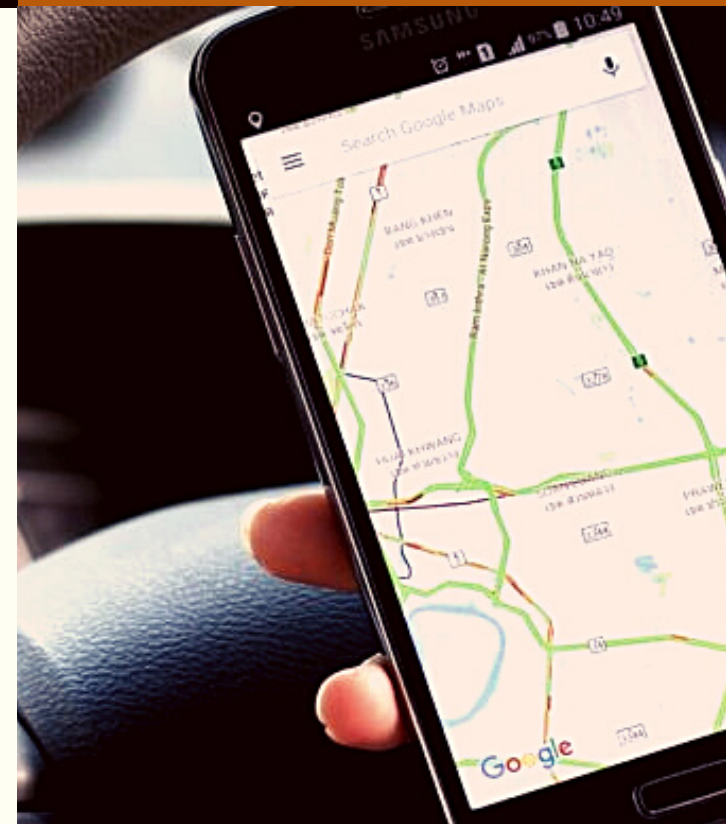

Reporting

Vehicle tracking reports offer a myriad of valuable data. From diagnostics to fuel usage, there are many tools at your disposal to overcome the fleet challenges you currently face.

Whether you are looking to implement a safety program, a green initiative, or improve your customers' experience, vehicle tracking reports provide actionable data to improve your workforce.

**SOME TRACKING SYSTEM MAY
USE BOTH PASSIVE AND ACTIVE
TRACKING.**

Expenses

VMS can bring the advantage of better financial management owing to the information based on the kind of expenses concerning your fleet.

- Regular Income.
- Trip Expenses.

Servicing or Maintenance
